

## Advanced Neural Therapy and European Biological Medicine Workshop New York ~ March 8 – 10, 2019

Neural Therapy (NT) is one of the most effective and safe therapeutic modalities and is becoming more requested by patients in the US and Canada. Injection outcomes are versatile providing healing, detoxification and anti-aging effects. NT is applicable in most medical, dental, psychiatric, pain management and other areas. Knowledge of NT will allow you to become an exceptional, highly demanded practitioner and provide you with an additional revenue stream.

This hands-on course is aimed at those with some prior experience in NT. Many injection techniques were never conveyed in the US. In addition, the course will illuminate the German Biological Medicine (GBM) approach rarely taught in North America. It will help to amalgamate multiple diagnostic and treatment modalities helping to resolve common and treatment resistant conditions. The course will help to integrate recent scientific evidence-based achievements in GBM and NT with their application in a day-to-day practice.

### Lectures:

- The old and innovative “royal drug“ Procaine
- Practice of systemic Procaine treatment with infusion and orally
